

Call for Poster Abstracts
5th Annual Faculty Development Workshop
***Best Practices for Planning and Evaluation of
Interprofessional Education***
Al Ain University
February 23 / 24, 2020
Abu Dhabi, UAE

Participants of the workshop are invited to share information regarding one or more elements of their school's interprofessional program via a poster presentation(s). All posters will be displayed during the Faculty Development Workshop. No formal presentation will be required, but participants will be able to review posters and network with other participants throughout the program, mainly during breaks. We believe that the poster session will be idea generating and help to identify collaboration opportunities between institutions.

The February 23 / 24 Faculty Development Program theme will be “**Best Practices for Planning and Evaluation of Interprofessional Education**”. Schools are encouraged to consider one of the four subcategories below for their poster submissions. Each poster should focus on one theme only, but schools can present multiple posters, each addressing a different theme.

1. Design / Structure of Interprofessional Program

How are your interprofessional practice experiences integrated with courses within your curriculum? What are core requirements (i.e., skills, activities) of your practice experiences?

2. Preparation and Readiness of Students

How do you prepare students for their interprofessional practice experiences (i.e., orientation programs)? How do you ensure students are ready for practice-based interprofessional learning?

3. **Recruitment, Training, and Development Strategies for Preceptors and Instructional Sites**

How do you recruit preceptors/instructors to help deliver your practice experiences in an interprofessional environment? How do you provide training to preceptors to prepare them for teaching students in the clinical setting? What do you offer for ongoing development of preceptors/instructors?

4. **Interprofessional Program - Quality Assurance / Improvement Strategies**

How do you assess the overall success of your interprofessional program (consider any element of program – staff, students, curriculum, or preceptors)? What strategic planning initiatives have you employed?

5. **Other** – Please feel free to address any other interprofessional-related topic that you feel is important but does not fit in one of the above four categories.

All posters will be accepted. The School posters will be displayed at the 5th Annual Faculty Development Program (2020) at Al Ain University in Abu Dhabi, UAE. Each poster should be **no larger than 90 cm wide by 150 cm high** (vertical/portrait format).

We look forward to seeing you in Abu Dhabi and viewing your poster!
